Experiences

Dr.coffee D30

The D30 is a fully - automatic coffee machine for coffee chains or specialty coffee shops.It can make milk foam with a water content of "0",creating a "golden ring" effect on the coffee surface.Meanwhile,it is equipped with two large - capacity boilers,which significantly improve both the output efficiency and stability.It can be paired with two milk sources simultaneously,allowing seamless switching during production to make more types of milk - based coffee drinks.

One - touch Dry Milk Foam

Different from the traditional way of heating milk foam with steam,this product uses a heating block to heat the milk foam,thus achieving "dry milk foam". It makes the milk foam thicker and smoother,and can better maintain its shape and stability,enabling the creation of more fancy drinks.

Seamless Switch Between Two Milks

This product can work with two milk sources at the same time.There is no need to manually switch milk sources during production.Just click the corresponding drink with one key to automatically switch to the corresponding milk source,enabling the production of more types of milk - coffee drinks.

Large - Capacity Dual Boilers

Equipped with two heating boilers,coffee extraction and steam generation can be carried out simultaneously. Each large boiler has a capacity of 1.2L.,providing sufficient "power",significantly reducing the production time of each cup and maintaining the consistency of production quality.

More Premium Experiences

The super - large 13.3 - inch touch screen (30% larger than the same level) further improves the convenience of operation and touch accuracy. The drink outlet can be automatically raised and lowered to fit different cup sizes, keeping the operation table tidy and simplifying the operation process.

Feature

- Independent Hot Water Wand ●
- Smart Steam Wand ○
- One-touch Milk Coffee ●
- Custom Brewing ●
- Automatic Barrel Water Suction ●
- Pressurized Automatic Water Inlet ●
- Auto Milk Clean ●
- IoT Mobile Payment ○
- Large - Capacity Dual Boilers ●

Specifications

Bean Hopper Capacity (g)	1200*2
Grounds box capacity(g)	1000
Powder Container(L)	2.3*2
Display Size (horizontal)	13.3"
Rated Voltage (V)	220
Rated Frequency (Hz)	50
Rated Power (W)	3100
Main Unit Weight (kg)	43
Machine D*W*H(cm)	34*54*83

Capacity

Advised Daily Output (cup)	300
Cup Output per Hour (L)	140
Preset Drink Types	27
