Dr.Coffee F80

As an innovative product in the office and hotel product line, F80 first adopts a 21g metal brewing unit and is equipped with a storage-type heating boiler, which can achieve single-time large cup/double espresso and ensure rich flavor. Its dual heating system (boiler configuration) also makes the product operate more stably and efficiently.

“Large” Weight Powder Capacity

The OCS product line first uses a 21g large - capacity metal brewer. It can produce a large cup/double cups of strong coffee at one time, compatible with multiple flavors and save waiting time.

“True” Boiler Configuration

Dual heating of boiler + electric heating plate, milk and coffee are dispensed simultaneously, improving efficiency and quality. Installation only requires a conventional 10A socket.

“Accurate” Milk Temperature Adjustment

4 - level (55/60/65/70°C) milk temperature adjustment, suitable for different drink flavors, easy to operate.

“Full” Water Inlet Modes

Suitable for various site water inlet conditions. By selecting the corresponding configuration, F80 can provide a complete solution.

Feature

- Independent Hot Water Wand ●
- Independent Steam Wand ○
- Water Tank ○
- One-touch Milk Coffee ●
- Automatic Barrel Water Suction ●
- Pressurized Automatic Water Inlet ●
- Intelligent Automatic Cleaning ●
- IoT Mobile Payment ○

Specifications

Bean Hopper Capacity (g)	1200*1
Grounds box capacity (pcs)	70
Drip Tray Capacity (L)	2
Display Size (horizontal)	10.1"
Rated Voltage (V)	220
Rated Frequency (Hz)	50
Rated Power (W)	1500
Main Unit Weight (kg)	30
Machine D*W*H(cm)	40.5*54*66

Capacity

Advised Daily Output (cup)	100
Cup Output per Hour (L)	70
Preset Drink Types	24
