An all-around partner, a great pairing

Dual function
Convenient and beautiful

Twin-engine configuration
for full efficiency

Double Powder
Double Milk Drink as you like

Controllable Water Temperature
Upgraded Taste

Dr.coffee M22

M22 is a subversive design compressor direct cooling refrigerator and coffee maker integrated machine to solve the demand for multi-category beverages and fresh milk storage problems in the hotel and office areas. It supports dual milk source, dual powder, coffee DIY, and can mix a variety of fancy drinks, and the dual-boiler configuration can better meet the continuous production in commercial scenarios.

Dual function Convenient and beautiful

Compressor direct cooling refrigerator and coffee maker integrated design, enhance the overall appearance of the product at the same time, solve the common market problem of milk storage, 10.1-inch high-definition color screen, equipped with IPS retina full lamination technology and AF anti-fingerprint technology, touch more silky smooth.

Twin-engine configuration for full efficiency

Built-in dual-heating dual-pump system, you can make coffee and milk at the same time, under the premise of ensuring the quality of the output, to improve efficiency and reduce the waiting time of the user, easy to cope with the demand for centralized scenarios.

Double Powder, Double Milk Drink as you like

The product comes standard with 2 bean compartments and 1 compressor direct-cooling refrigerator, and an optional powder function or compressor direct-cooling refrigerator that supports dual milk storage, allowing users to mix drinks on demand, operate more conveniently, and enjoy DIY drinks as they wish.

Controllable Water Temperature Upgraded Taste

In order to better dissolve the powder without destroying the nutrients when making powder drinks, users can set the appropriate brewing temperature. The temperature can be adjusted in two grades, 65°C lock-fresh gear: low-temperature dissolution of nutrients will not be lost; 85°C instant gear: high-temperature instant dissolution without lumps.

Feature

- Independent hot water outlet ●
- Simultaneous coffee and milk dispensing ●
- Compressor direct cooling refrigerator ●
- Bottled water self-absorption ●
- Pressurized automatic water inlet ●
- Intelligent fully automatic cleaning ●
- Internet of things mobile payment ○

Technical sheet

Bean hopper capacity (g)	800*2
Powder box capacity (L)	2.5*2
Water tank capacity (L)	3
Milk box capacity (L)	4*2/3.5*1
Waste residue box capacity (g)	1000
Water retention plate capacity (L)	1.5
Screen size (Lateral)	10.1"
Rated voltage (V)	220
Rated frequency (Hz)	50
Rated power (W)	2000
Machine weight (Kg)	65
Machine D*W*H (Cm)	56.5*57.5*59

Capacity

Advised daily output (cups)	200
