Dr.Coffee T200

The T200 is a model for convenience store chains, foodservice channels, and large - scale office scenarios. It can fully meet the diverse needs for beverage types in such scenarios, as well as the needs for fast, stable cup - dispensing. With professional - feeling and differentiated appearance design, it enables end - users to have a more comprehensive experience.

Dual Beans & Dual Powders

Equipped with dual bean hoppers as standard, you can switch between different coffee beans at any time to produce your favorite flavors. It also comes with dual powder hoppers as standard, providing two types of powder - based drinks simultaneously. It can even be paired with a syrup machine, adding more layers to the drink flavors.

Dual - speed Grinding

Configured with a dual - grinding system, it works with the dual bean hoppers to grind coffee beans simultaneously. This doubles the grinding speed and significantly shortens the production time of each cup of coffee.

Cold Milk Drinks

Equipped with a professional milk pump, it can produce hot and cold milk, as well as cold/hot milk foam. Paired with an ice maker, it can offer customers a variety of fancy iced coffee drinks.

Mecha - style Design

The front panel of the machine uses a carbon - fiber visual effect, enhancing the overall luxurious texture. The side of the machine adopts a mecha - style design, making it more distinctive and recognizable.

Feature

- Independent Hot Water Outlet ●
- Quick - Release Metal Brewer ●
- Simultaneous Coffee & Milk Dispensing ●
- Simultaneous Coffee & Cold Water Dispensing ●
- Automatic Barrel Water Suction ●
- Pressurized Automatic Water Inlet ●
- Automatic Drainage Function ●
- Intelligent Automatic Cleaning ●
- IoT Mobile Payment ○

Specifications

Bean Hopper Capacity (g)	700*2
Powder Container(L)	1.8*2
Grounds box capacity(pcs)	70pcs/10g
Display Size (horizontal)	10.1"
Rated Voltage (V)	220-240
Rated Frequency (Hz)	50/60
Rated Power (W)	2700-3100
Main Unit Weight (kg)	24-30
Machine D*W*H(cm)	40.5*54*66

Capacity

Advised Daily Output (cup)	200
50ml Espresso Cup Yield per Hour (Cups)	100
200ml Espresso Cup Yield per Hour (Cups)	80
